Important Notification

1. Please read all instructions carefully before operate the rechargeable screwdriver and the charge station. Failure to follow all instructions listed below may result in electric shock fire and/or serious injure.
2. Please fully recharge the battery before assembling with screwdriver.
3. Before insert the battery, switch the Forward/Reverse lever to the middle position, in case of accident.
4. Do not place battery on high shelf. The battery should be placed on a flat and firm place to prevent children from touching.
5. Please do not place rechargeable battery in the poorly ventilated place, nor expose the battery in the dust or metal crumb.
6. Do not expose rechargeable battery directly under sun, high temperature, high humidity, and highly explosive gas.
7. It is forbidden to use different brand of battery other than KILEWS'on the charger. To disassemble and modify the battery is also not allowed. The use of other than genuine KILEWS battery may result in decreased tool performance and increased maintenance, and may invalidate all warranties.
8. Abusing the rechargeable battery may cause the battery damaged. If the liquid leak out due to the damage of the battery, please do not touch with your own buddy. If so, please use tab water to rinse off. If the liquid get into your eye, please contact a doctor immediately.
9. Rechargeable batteries have 6 months warranty. Depends on the frequency of use, the battery capacity gradually shortened (charging time). When the battery unused more than six months, please let battery fully charged once. Otherwise it will shorten the battery life time and will cause the battery to deactivated and not able to recharge.
10. The best working temperature to recharge the battery is from 0℃ to 30℃. When the battery temperature is below 0℃, the battery-liquid inside the rechargeable battery will be frozen, therefore the battery is not able to recharge.
11. Under normal usage, KILEWS battery guaranties 600 recharge times. Battery remains 75% capacity when battery recharge after 1000 times. Each recharge and discharge, battery capacity decreases.

Caution

Risk of Fire and Burns. Do Not Open, Crush, Heat Above 60°C (where is manufacturer's specified maximum temperature) or Incinerate. Follow Manufacturer's Instructions.
